BF, PH, GRS, RB, HR: 1/4/71

Comparing the recently-declassified SS control numbers with the Basic list as annotated for me by Simmons, I have no way of comparing what is not available with what was withheld in CD 87.

Nor do I have a separate list of SS CDs.

However, with regard to the other five listed, from the Simmons record, CD349 did contain SS826, withheld, not here listed as released.

With respect to CDs 372,446,486, those here indicated as available include all Simmons had indicated as withheld.

My listing of SS Controls in CD498 included 193, which is not here listed and, unlike CD 349, this entry does not say (All parts withheld from research).

I believe PH's listings may be more complete. If I read the SS intentions correctly, they were anxious to declassify all they felt they could. I therefore feel it might be helpful if anyone has the time, disposition and capability, to provide me with a list of still-withheld SS Controls. I do believe it possible that some may still be withheld through clerical error.

Sincerely,

HW
